Vol. 2 | 1958

IBM Journal of research and development

Editorial Staff

C. B. MacKenzie, *Editor*
H. B. Michaelson, *Associate Editor*
Will Burtin, *Graphics Consultant*
Nils Hansell, *Graphics Assistant*
M. T. Kucharik, *Production Manager*
Jane F. Murray, *Circulation Manager*

Advisory Board

W. W. McDowell, *Chairman*
J. W. Birkenstock
C. R. DeCarlo
C. C. Hurd
D. R. McKay
R. G. Mork
R. L. Palmer
E. R. Piore

Editorial Board

M. L. Lesser, *IBM Research Laboratory,* San Jose, California
A. Malmros, *IBM Airborne Computer Laboratory,* Owego, New York
R. E. Nienburg, *IBM Military Products Division* Kingston, New York
G. W. Petrie, *IBM Research Center* Yorktown, New York
P. J. Price, *Watson Research Laboratory,* New York City
F. J. Roehm, *IBM Product Development Laboratory,* Endicott, New York
A. P. Speiser, *IBM Research Laboratory,* Zurich, Switzerland
R. B. Stryker, *IBM Product Development Laboratory,* Poughkeepsie, New York
J. Taylor, *IBM Product Development Laboratory,* San Jose, California

The IBM Journal of Research and Development is regularly indexed and abstracted by Science Abstracts (I.E.E.—Britain), Chemical Abstracts, The Engineering Index, Physikalische Berichte, ASM Review of Metal Literature, Mathematical Reviews, Bulletin Signalétique (C.N.R.S.—France), Electronic Industries & Tele-Tech, Electronic & Radio Engineer, Psychological Abstracts, Aviation Research & Development and the Library of U. S. Naval Research Laboratory.

The IBM Journal of Research and Development is published quarterly in January, April, July and October by International Business Machines Corporation, 590 Madison Avenue, New York 22, N. Y. Officers: Thomas J. Watson, Jr., President; L. H. LaMotte, Executive Vice-President; Albert L. Williams, Executive Vice-President; Charles V. Boulton, Treasurer; Henry W. Trimble, Jr., Secretary. Subscriptions are accepted as follows: In the United States and North America, one year, $5.00; two years, $9.00; three years, $13.00; single copies, $1.25. In other countries, one year, $8.00; 2 years, $14.00; three years, $20.00; single copies, $2.00.

List of issues in Volume 2

Number 1, January 1958 . . . . . 1- 88
Number 2, April 1958 89-176
Number 3, July 1958 177-264
Number 4, October 1958 265-368

New York 22, New York

Printed in U.S.A.

Table of Contents

January 1958 | Vol. 2, No. 1

● Articles

A Learning Machine: Part I
by R. M. Friedberg 2-13

An Error-Sampled Sweep-Position Control System
by C. H. Knapp, E. Shapiro, and R. A. Thorpe . . 14-35

Magnetic-Recording-Head Selection Switch
by L. D. Seader 36-42

Computation of Arctan N *for* $-\infty<N<+\infty$ Using an Electronic Computer
by E. G. Kogbetliantz 43-53

Effects of Low Temperatures on Transistor Characteristics
by A. B. Credle 54-71

A New Approach to Small-Computer Programming and Control
by J. J. Lentz 72-83

April 1958 | Vol. 2, No. 2

● Articles

High-Resolution Magnetic Recording Structures
by A. S. Hoagland 90-104

Programs as a Tool for Research in Systems Organization
by J. Jeenel 105-122

On the Statistical Mechanics of Impurity Conduction in Semiconductors
by P. J. Price 123-129

Pulse Time Displacement in High-Density Magnetic Tape
by R. A. Skov 130-141

Reliability Improvement by the Use of Multiple-Element Switching Circuits
by W. E. Dickinson and R. M. Walker 142-147

Reliability Improvement through Redundancy at Various System Levels
by B. J. Flehinger 148-158

The Automatic Creation of Literature Abstracts
by H. P. Luhn 159-165

● Short Communications

On Checking an Adder
by W. W. Peterson 166-168

A Note on the Computation of Eigenvalues and Vectors of Hermitean Matrices
by T. C. Chen and R. A. Willoughby 169-170

July 1958 | Vol. 2, No. 3

- Articles

A Direct-Reading Printed-Circuit Commutator for Analog-to-Digital Data Conversion
by C. A. Walton 178-192

Phase Equilibria in the Ferrite Region of the System Manganese-Iron-Oxygen
by M. W. Shafer 193-199

The Physical Interpretation of Mean Free Path and the Integral Method
by P. J. Price 200-203

A Load-Sharing Matrix Switch
by G. Constantine, Jr. 204-211

Study of the Second-Order Ferroelectric Transition in Tri-Glycine Sulfate
by S. Triebwasser 212-217

Computation of Arcsin N for $0<N<1$ Using an Electronic Computer
by E. G. Kogbetliantz 218-222

A Full Binary Adder Employing Two Negative-Resistance Diodes
by J. W. Horton and A. G. Anderson 223-231

Curve Fitting for a Model of Applied Research and Development Scheduling
by P. V. Norden 232-248

- Short Communications

The Bipolar Righi-Leduc Effect
by P. J. Price 249-251

Magnetic Field Plotter for Superconducting Films
by H. E. Kronick 252-254

October 1958 | Vol. 2, No. 4

- Conference Papers

Communication Sciences in a University Environment
by J. B. Wiesner 268-275

Problems in Scientific Communication
by E. de Grolier 276-281

How Much Science Can You Have at Your Fingertips?
by I. J. Good 282-288

Channels with Side Information at the Transmitter
by C. E. Shannon 289-293

Artificial Auditory Recognition in Telephony
by E. E. David, Jr. 294-309

The Role of Large Memories in Scientific Communications
by M. M. Astrahan 310-313

A Business Intelligence System
by H. P. Luhn 314-319

Chess-Playing Programs and the Problem of Complexity
by A. Newell, J. C. Shaw and H. A. Simon . . . 320-335

Intelligent Behavior in Problem-Solving Machines
by H. L. Gelernter and N. Rochester 336-345

Computation in the Presence of Noise
by P. Elias 346-353

- Article

Machine-Made Index for Technical Literature — An Experiment
by P. B. Baxendale 354-361

Author Index

A

Anderson, A. G.
see under **Horton, J. W.** 223
Astrahan, M. M.
Role of large memories in scientific communications 310

B

Baxendale, P. B.
Machine-made index for technical literature . . . 354

C

Chen, T. C., and R. A. Willoughby
Computation of eigenvalues and vectors of hermitean matrices 169
Constantine, G., Jr.
Load-sharing matrix switch 204
Credle, A. B.
Effects of low temperatures on transistor characteristics 54

D

David, E. E., Jr.
Artificial auditory recognition in telephony . . . 294
de Grolier, E.
Problems in scientific communication 276
Dickinson, W. E., and R. M. Walker
Reliability improvement by the use of multiple-element switching circuits 142

E

Elias, P.
Computation in the presence of noise 346

F

Flehinger, B. J.
Reliability improvement through redundancy at various system levels 148
Friedberg, R. M.
Learning machine: Part 1 2

G

Gelernter, H. L., and N. Rochester
Intelligent behavior in problem-solving machines 336
Good, I. J.
How much science can you have at your fingertips? 282

H

Hoagland, A. S.
High-resolution magnetic recording structures . . 90
Horton, J. W., and A. G. Anderson
Full binary adder employing two negative-resistance diodes 223

J

Jeenel, J.
Programs as a tool for research in systems organization 105

K

Knapp, C. H., E. Shapiro, and R. A. Thorpe
Error-sampled sweep-position control system . . 14
Kogbetliantz, E. G.
Computation of arctan N for $-\infty<N<+\infty$ using an electronic computer 43
Computation of arcsin N for $0<N<1$ using an electronic computer 218
Kronick, H. E.
Magnetic field plotter for superconducting films 252

L

Lentz, J. J.
New approach to small-computer programming and control 72
Luhn, H. P.
Automatic creation of literature abstracts 159
Business intelligence system 314

N

Newell, A., J. C. Shaw, and H. A. Simon
Chess-playing programs and the problem of complexity 320
Norden, P. V.
Curve fitting for a model of applied research and development scheduling 232

P

Peterson, W. W.
Checking an adder 166
Price, P. J.
Bipolar Righi-Leduc effect 249
Physical interpretation of mean free path and the integral method 200
Statistical mechanics of impurity conduction in semiconductors 123

R

Rochester, N.
see under **Gelernter, H. L.** 336

S

Seader, L. D.
Magnetic-recording-head selection switch 36
Shafer, M. W.
Phase equilibria in the ferrite region of the system manganese-iron-oxygen 193
Shannon, C. E.
Channels with side information at the transmitter 289
Shapiro, E.
see under **Knapp, C. H.** 14
Shaw, J. C.
see under **Newell, A.** 320
Simon, H. A.
see under **Newell, A.** 320
Skov, R. A.
Pulse time displacement in high-density magnetic tape 130

T

Thorpe, R. A.
see under **Knapp, C. H.** 14
Triebwasser, S.
Study of the second-order ferroelectric transition in tri-glycine sulfate 212

W

Walker, R. M.
see under **Dickinson, W. E.** 142
Walton, C. A.
Direct-reading printed-circuit commutator for analog-to-digital data conversion 178
Wiesner, J. B.
Communication sciences in a university environment 268
Willoughby, R. A.
see under **Chen, T. C.** 169

Subject Index

A

Abstracts
Automatic creation explored 159-65
Acceptors (Impurity)
Conduction statistical mechanics 124-29
Adders
see **Binary adders**
Ambipolar effect
see **Righi-Leduc bipolar effect**
Arcsin *N*
Computation for $0<N<1$ direct 218-22
Subroutine $0 \leq N \leq 1$ 220-22
Arctan *N*
Computation for $-\infty<N<+\infty$ 43-53
Arithmetic unit (Computer)
Multiple units concurrent computation 119-22
Residue checking system 166-68
Associate matrix
see **Hermitean matrix**
Auto-Abstracts
Creation with IBM-704 159-65
Auto-Point mode
Use in IBM-610 72

B

Binary adders
Negative-resistance diodes in pairs 223-31
Boltzmann transport equation
Integral method interpreted 200-03
Vector mean free path interpreted 200-03
Brain
Capacity to store information 282-86
Brush (Electric)
Design and manufacture 190

C

Cathode-ray tube
Sweep control 14-35
Character
Recognition
see also under **Telephony**
no entries this year
Characteristics (Electronic)
see also under specific characteristics, e.g., **Transport lag** *and under names of components, e.g.,* **Transistors**
no entries this year
Chebyshev expansion
Arcsin *N* direct computation 218-19
Check
Adder residue-check 166-68
Circuits
see also **Printed circuits**
Switching circuits
no entries this year
Communication
Aids 277-79; 286-87
Barriers 276-77; 283-86
Dissemination system 314-19
M.I.T. Center activities 268-75
Mathematical theory 271-74
Communication sciences center (M.I.T.)
Activities described 268-75
Commutator
Converter analog-digital
Direct-readout 179-92
Printed circuit 179-92
Computers
see also components or routines under
Check
Converter
Programming
Transistors
see also **Digital computers** *and individual names, e.g.,* **IBM 704**
Indexing uses 354-61
Reliability Improvement
Multiple-element switching circuits 142-47
Unit redundancy 148-58
Noise computation 346-53
Thinking machine 336-45
Conduction (Electric)
Germanium impurities 123-29
Thermoelectric permutation 127
Conference on communication of scientific information
[Papers] 268-353
Control systems
see also under specific types, e.g., **Feedback control systems**
no entries this year
Converter (Computer)
Analog — digital 29-30
Printed circuit commutator 179-92
Digital — analog 30-33

Crosstalk
Magnetic recording 39-42
Crystal growth
Ferrite
Mn_3O_4 — Fe_3O_4 join 193-99
Crystals
Ferrite Mn-Fe-O system
Phase relationships 193-99

D

Detenting
Methods 188-90
Development projects
Forecasting requirements 232-48
Digital computers
see also names of specific computers, e.g., **IBM 650**
Miniature IBM 610 72-83
Reliability
Improvement by unit redundancy 148-58
Digital control systems
see **Sampled-Data systems**
Diode
Use in binary adders 223-31
Donors
Minority traps 127
Mott hypotheses of division 124-29

E

Eigenvalues
Computation for Hermitean matrices 169-70
Encoding
see also **Literary data processing**
Aided by additional information 289-93
Engineering projects
Forecasting requirements 232-48
Error
see **Check**

F

Feedback
see also **Encoding**
no entries this year
Feedback control system
Sampled-data theory applied 14-35
Ferrate (III)
see **Ferrite**
Ferrite
Crystal phase relationship
Mn-Fe-O system 193-99
Ferroelectric materials
see also names of specific materials, e.g., **Tri-glycine sulfate**
no entries this year
Ferrosoferric oxide
see **Iron oxide—Black**
Fourier transform
see also **Z-Transform**
no entries this year

G

Geometry
Plane
Euclidean theorem proving by computer 337-42

H

Hermitean matrix
Computation of eigenvalues and vectors . . . 169-70
Heuristic process
Theorem machine 336-45

I

IBM 610
Control 78-83
Description 73-76
Programming 76-83
IBM 650
Use in machine indexing 360-61
IBM 704
Auto-abstract production experiment 162
Chess-playing program 324-26
Learning machine experiment 4-13; 344
IBM 727-III
Diagram 131
Use in pulse time displacement analysis 130-41
Indexing
Machine experiment 354-61
Information dissemination
see **Communication**
Information retrieval
Aids 286-87
Indexing by machine 354-61
Integral method
Interpretation 200-03
Interference
see also **Noise**
no entries this year

Iron oxide
Black (Fe_3O_4)
Ferrite phase equilibria 193-99

L

Language
see also **Speech**
Machine input 280-81; 354-61
LaPlace transform
see also **Z-Transform**
no entries this year
Learning Machines
see also **Computers**
Experiments 2-13; 336-45
Computer Herman 4-5
Learning procedure 5-7
Problems 7-13
Literary data processing
Abstracts created by machine 159-65
Character recognition
Auditory applications in telephony 294-309
Encoding 280-81
Indexing by machine 353-61
Storage in large memories 310-13
Systems evaluated 219-80
Literature searching
see **Information retrieval**

M

Maehly method
Arcsin *N* direct computation 219-20
Magnetic-Recording-Head
Crosstalk 39-42
High-resolution structures 91-104
Probe structures
Design concepts 93-98
Ring-type
Design concepts 93-98
Selection switch 36-42
Circuit 36
Schematic diagram 37
Wire-grid structures
Design concepts 101-03
Magnetic tape
Pulse time displacement measurement 130-41
Magnetite
see under **Iron oxide-Black**
Manganese oxide (Mn_3O_4)
Ferrite phase equilibria 193-99
Massachusetts Institute of Technology
Communication Sciences Center
Activities described 268-75
Matrix switches

Language
Recognition by segmentation 294-309
Sound spectrogram rules 301-05
Storage (Computer)
Cyclic 116-119
Large capacity 310-13
Linear 117-19
Magnetic
Focusing 91-104
Recording-head selection switch 36-42
Matrix switch load sharing 204-11
Random-access
Trapped-flux magnetic field plotter 252-54
Superconductivity
Magnetic field plotter 252-54
Sweep control 14-35
Switches
Matrix
Load-sharing 204-11
Switching circuits
Multiple-elements improve reliability 142-47

T

T A S I
Description 297
Telephony
Character recognition apparatus 294-309
Thinking machines
see **Learning machines**
Time-assignment speech interpolation
see **T A S I**
Transistors
p-n junction
Germanium
Characteristics 54-71
Tri-glycine sulfate
Dielectric constant 213-14
Dielectric nonlinearity 215-16
Ferroelectric transition 212-17
Spontaneous polarization 214
Turing, A. M.
Chess-playing program 323-24

V

Vector computation
Hermitean matrices 169-70
Vector mean free path
Definition 200
Interpretation 200-03
Vocoder
Description and use 297-301
von Neumann 2-out-of-3 majority
Switching circuit reliability 142-43

Z

Z-Transform
Application to sampled-data analysis 17-19
